Portfolio Rebalancing:

As per Para 4.5.5 of SEBI Master circular no. HO/24/13/11(1)2026-IMD-POD-1/17602/2026 dated March 20, 2026 and circulars issued thereunder, in case of change in constituents of the index due to periodic review, the portfolio of the scheme will be rebalanced within 7 calendar days.

As per Para 7.24 of SEBI Master Circular no. HO/24/13/11(1)2026-IMD-POD-1/17602/2026 dated March 20, 2026, the scheme shall deploy the funds garnered in an NFO within 30 business days from the date of allotment of units.

In an exceptional case, if the AMC is not able to deploy the funds in 30 business days, reasons in writing, including details of efforts taken to deploy the funds, shall be placed before the Investment Committee of the AMC. The Investment Committee, if so desired, can extend the timelines up to thirty (30) business days from the date of completion of mandated deployment period.

Short Term Defensive Consideration:

Subject to Para 1.9.1.(b) of SEBI Master circular no. HO/24/13/11(1)2026-IMD-POD-1/17602/2026 dated March 20, 2026 and circulars issued thereunder, the asset allocation pattern indicated above may change for a short-term period on defensive considerations, keeping in view market conditions, market opportunities, applicable regulations and political and economic factors. These proportions may vary depending upon the perception of the Fund Manager, the intention being at all times to seek to protect the interests of the Unit holders. Such changes in the investment pattern will be rebalanced within 7 calendar days from the date of deviation and further action may be taken as specified under SEBI Circulars/ AMFI guidelines issued from time to time. In the event of involuntary corporate action, the scheme shall dispose the securities not forming part of the underlying index within 7 days from the date allotment/ listing.

Investment Strategy

To achieve the investment objective, the scheme will follow passive investment strategy with investments in stocks in the same proportion as in **Nifty Alpha Low-Volatility 30 Index**. The investment strategy would revolve around reducing the tracking error through regular rebalancing of the portfolio, taking into account the change in weights of stocks in the Index as well as the incremental collections/redemptions in the Scheme. Such rebalancing shall be done in accordance with timelines prescribed by SEBI from time to time.

Index Scheme being a passive investment carries lesser risk as compared to active fund management. The portfolio follows the index and therefore the level of stock concentration in the portfolio and its volatility would be the same as that of the index, subject to tracking error. Thus, there is no additional element of volatility or stock concentration on account of fund manager decisions.

A small portion of the net assets will be held as cash or will be invested in debt and money market instruments (as mentioned under asset allocation section) permitted by SEBI/RBI including TREPS or in alternative investment for the TREPS as may be provided by the RBI, to meet the liquidity requirements under the Scheme.

The Scheme may take an exposure to equity derivatives of constituents or index derivatives of the underlying index for short duration when securities of the index are unavailable, insufficient or for rebalancing at the time of change in index or in case of corporate actions, as permitted by SEBI from time to time.

Derivative products are leveraged instruments and can provide disproportionate gains as well as disproportionate losses to the investor. Execution of such strategies depends upon the ability of the fund manager to identify such opportunities. Identification and execution of the strategies to be pursued by the fund manager involve uncertainty and decision of fund manager may not always be profitable. No assurance can be given that the fund manager will be able to identify or execute such strategies.

The risks associated with the use of derivatives are different from or possibly greater than, the risks associated with investing directly in securities and other traditional investments.

The Scheme may use SLBM for earning additional income for the scheme with a lesser degree of risk.

Scheme may invest in the units of Mutual Fund schemes of Kotak Mahindra Mutual Fund or any other Mutual Funds in terms of the prevailing SEBI (MF) Regulations.

The measures mentioned above is based on current market conditions and may change from time to time based on changes in such conditions, regulatory changes and other relevant factors.

Portfolio Turnover:

Portfolio Turnover is a term used to measure the volume of trading that occurs in a Scheme's portfolio during a given time period. Kotak Nifty Alpha Low-Volatility 30 Index Fund is a passively managed open-ended index scheme. It is therefore expected that there would be a number of subscriptions and redemptions on a daily basis. Hence, it is difficult to estimate with any reasonable measure of accuracy, the likely turnover in the portfolio. Generally, turnover will depend upon the extent of purchase and redemption of units and the need to rebalance the portfolio on account of change in the composition, if any, and corporate actions of securities included in **Nifty Alpha Low-Volatility 30 Index**. The Scheme has no specific target relating to portfolio turnover.

Risk Profile of the Scheme

Mutual Fund Units involve investment risks including the possible loss of principal. Please read the SID carefully for details on risk factors before investment.

Scheme Specific Risk Factors

Tracking errors are inherent in any index fund and such errors may cause the schemes to generate returns which are not in line with the performance of the **Nifty Alpha Low-Volatility 30 Index** or one or more securities covered by / included in the **Nifty Alpha Low-Volatility 30 Index** and may arise from a variety of factors. Delayed realizations, cash for redemptions can result into tracking error, including transactions costs of investments etc. The Scheme is subject to the principal risks described below. Some or all of these risks may adversely affect Scheme's NAV trading price, yield, total return and/or its ability to meet its objectives.

- 1) The NAV of the units is closely related to the value of stocks that form a part of the benchmark index. The value of this will react to stock market movements and may result in changes in the NAV of units under the scheme. There could also be movements in the scheme's NAV due to changes in interest rates, macro-economic and political developments and over longer periods during market downturns;
- 2) Tracking error may have an impact on the performance of the scheme. However, KMMF will endeavor to minimize the tracking error through regular rebalancing of the portfolio.
- 3) The Scheme is a passively managed scheme and provides exposure to the benchmark and tracking its performance and yield. The Schemes performance may be affected by a general price decline in the stock markets. The Scheme invests in the stocks comprising the index regardless of their investment merit. The Mutual Fund does not attempt to take defensive positions in declining markets.
- 4) As the scheme proposes to invest not less than 95% of the net assets in securities comprising of Nifty Alpha Low-Volatility 30 Index, any deletion of stocks from or addition to in Nifty Alpha Low-Volatility 30 Index may require sudden and immediate liquidation or acquisition of such stocks at the prevailing market prices irrespective of whether valuation of stocks is attractive enough. This may not always be in the interest of unitholders.
- 5) The performance of the Nifty Alpha Low-Volatility 30 Index will have a direct bearing on the performance of the scheme. Hence any composition change by virtue of weightage or stocks selection will have an impact on the scheme.
- 6) Capital Gains Impact: Investors who trade in Kotak Nifty Alpha Low-Volatility 30 Index Fund may be subject to Long Term Capital Gains or Short Term Capital Gains. Investors are requested to consult their tax / legal consultants before investing in the scheme.
- 7) The scheme will attract provisions of take over regulations, if KMMF invests in more than 10% of the paid up capital of a company and therefore may result into tracking errors and / or may not be able to accept further subscription in the Scheme.

The Index reflects the prices of securities at a point in time, which is the price at close of business day on the stock exchange. The Scheme, however, may at times trade these securities at different points in time during the trading session and therefore the prices at which the Plan trade may not be identical to the closing price of each scrip on that day on the BSE / NSE. In addition, the Scheme may opt to trade the same securities on different exchanges due to price or liquidity factors, which may also result in traded prices being at variance, from BSE / NSE closing prices.

Investments in the Scheme are subject to various risk factors including but not limited to risks associated with:

- Risk specific to investing in securities forming part of Nifty Alpha Low-Volatility 30 Index
- Risks associated with Capital Markets or Equity Markets
- Risks associated with Debt / Money Markets
- Risk Associated with Investment in Derivatives Market
- Risk associated with investment in Government securities and Triparty repo on Government securities or treasury bills
- Risk associated with Securities Lending
- Risks associated with segregated portfolio
- Risks associated with Tracking Error / Tracking Difference
- Risk associated with investing in Units of Mutual Funds

For details on risk factors and risk mitigation measures, please refer SID.
